Resource taken from the **CensusAtSchool Project** at [www.censusatschool.org.uk](http://www.censusatschool.org.uk)

*Here are some ideas for using the data:*

Make a table showing the schools **in order of size**.

Write some sentences about the data

Can you locate these schools on a map of England and Wales ?

Do the postcodes help you find out where the schools are ?

Try using the postcodes in <http://maps.google.co.uk/> or <http://www.UpMyStreet.com> on the web.

Which is the largest school in London ? South of England ? etc

Can you say whether the schools are in the North, South, East or West of England ?

Can you think why a lot of these schools are either in big cities or rural areas.

Look at how many pupils Ashfield School has got. It has pupils aged from 11 to 18. Given that 200 pupils are in the sixth form (years 12 and 13) How many will be likely to be in each year group 7 to 11 ? How many tutor groups do you think will be in each year ?

Draw a picture graph comparing the size of your school with one of these.
